Education

VIT Bhopal University BTech in Computer Science Engineering	Cumulative GPA: 8.68/10	Bhopal, Madhya Pradesh
12th Standard DL Dav Model School CBSE	Percentage: 84.8/100	Delhi Jul 2022
10th Standard DL DAV Model School CBSE	Percentage: 89.4/100	Delhi Jul 2020

Projects

[InterCodingView \(Online Coding Interview Platform\)](#)

- **Engineered a high-concurrency interview system** using Next.js and TypeScript, integrating Stream API for low-latency video, screen sharing, and automated session recording.
- **Architected a reactive backend using Convex** to handle real-time state synchronization, reducing data-fetching latency and ensuring sub-100ms updates for collaborative coding environments.
- **Implemented secure RBAC and authentication** via Clerk, optimizing production-ready workflows with modular Tailwind CSS components for a 95+ Lighthouse performance score.

[Lumina-HQ \(Multi-Tenant Document Analysis Tool\)](#)

- **Multi-Tenant Architecture:** Engineered a secure data isolation layer using **Next.js 16** and **Prisma**, implementing robust workspace partitioning and role-based access control (RBAC) via **Clerk**.
- **AI-Driven Intelligence:** Integrated **Google Gemini AI** to automate document processing, enabling instant summarization, sentiment analysis, and metadata extraction for unstructured data.
- **Cloud Infrastructure:** Streamlined secure document management using **Vercel Blob** and **Server Actions**, ensuring type-safe file handling and optimized persistence for high-concurrency environments.

Certification

Oracle Certified Java Foundations Associate	Apr 2025 – July 2025
● Validated foundational proficiency in core Java programming concepts, including Object-Oriented Programming (OOP) principles, data structures, and control flow. ● Demonstrated understanding of Java syntax, basic application development, and error handling, essential for entry-level software development roles.	

IBM Certified Cyber Security Analyst	Apr 2025 – June 2025
● Certified in comprehensive cybersecurity analysis methodologies, covering threat intelligence, vulnerability management, and risk assessment. ● Gained practical knowledge in security operations, incident response, and SIEM tool concepts, relevant for defending against modern cyber threats.	

The Bits and Bytes of Computer Networking	Sep 2024 – Nov 2024
● Acquired foundational knowledge in computer networking principles, including TCP/IP, DNS, routing, and common networking protocols. ● Developed understanding of network infrastructure, troubleshooting techniques, and network services, essential for IT support and system administration roles.	

ADDITIONAL

Technical Skills: Java, HTML, CSS, JavaScript, Python, SQL
Languages: English, Hindi, Basics of Spanish
