GitHub | LinkedIn | LeetCode

SKILLS

Languages : JavaScript, TypeScript, Java, HTML, CSS

Frontend : React, Next.js, Tailwind CSS, Shadcn UI, React Router, Framer Motion, Zustand

Backend : Node.js, Express.js, REST APIs, Bcrypt, JWT, HTTP Cookies, Authentication

Databases & ORM : MongoDB, Mongoose, PostgreSQL, SQL, Prisma

Tools & Cloud : Git, GitHub, Postman, Render, Clerk, Convex, Stream API

PROJECTS

TutorialSync (AI Tutorial Modernizer) | GitHub

React, Node.js, Express, MongoDB, Gemini AI

- Built and deployed **TutorialSync**, a full-stack AI platform that analyzes YouTube tutorials and technical topics to **identify deprecated APIs and outdated practices** and generate modernized implementation guides with side-by-side code comparisons.
- Engineered a **Node.js/Express REST API** integrating Google Gemini server-side to generate context-aware migration guides; secured endpoints using **JWT httpOnly cookies, Google OAuth, rate limiting, and input validation**.
- Developed a **React + Vite frontend** with real-time analysis progress, syntax-highlighted "Then vs. Now" code comparisons, a persistent **AI Mentor chat**, and one-click Markdown export; deployed using Vercel and Render.

Lumina-HQ (Multi-Tenant Document Analysis Tool) | GitHub

Next.js, Prisma, Gemini API, Vercel Blob, Clerk

- Built **Lumina-HQ**, a full-stack AI document intelligence platform using Next.js, Prisma, and PostgreSQL, enabling teams to analyze PDFs, Markdown, and text files through **5 Gemini-powered workflows**: summarization, Q&A, sentiment analysis, entity extraction, and structured JSON export.
- Engineered **multi-tenant workspace isolation** using Clerk Organizations and database-level query partitioning, ensuring each organization's documents and application data remain **isolated from other tenants**.
- Designed a **Gemini-powered document processing pipeline** that transforms unstructured documents into cited Q&A responses, executive summaries, extracted entities, and structured JSON outputs, automating repetitive document analysis workflows.

InterCodingView (Online Coding Interview Platform) | GitHub

Next.js, Convex, Stream API, Tailwind CSS

- Built a **real-time technical interview platform** with a collaborative Monaco code editor, **multi-language code execution** (JavaScript, Python, Java), and integrated video/audio communication for remote coding interviews.
- Engineered a **reactive backend using Convex and Next.js** to synchronize interview state, code output, and scheduling across clients, with **role-based access control** through Clerk authentication.
- Integrated **Stream.io** for video/audio calls, **screen sharing and session recording**, alongside a candidate evaluation workflow supporting Markdown feedback and star-based ratings.

CERTIFICATIONS

- Oracle Certified Java Foundations Associate** — Demonstrated proficiency in Java fundamentals, OOP, data types, control structures, and core Java concepts.
- IBM Cyber Security Analyst** — Developed knowledge of cybersecurity, network security, threat analysis, incident response, and security practices.
- Google AI Essentials** — Learned practical applications of generative AI, responsible AI usage, prompting, and AI-assisted workflows.
- Google Prompting Essentials** — Applied structured prompting using context, examples, constraints, and iterative refinement.

EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering

July 2023 – Present

CGPA: 8.70/10
